

# QUALITY POLICY

**MYM Fundiciones'** mission is to produce and market cast parts and related services that fully meet its customers' expectations, while ensuring environmental protection, worker safety, and respect for society in general, in a sustainable and profitable manner.

To achieve this goal, the company has implemented an **Integrated Quality Management System** adapted to its production activities.

The principles that guide this system are:

- Promote **continuous improvement** by establishing and periodically reviewing goals and objectives.
- Always consider customer requirements and needs.
- Comply with all **applicable legal, regulatory, and contractual obligations**.
- Maintain a firm commitment to **pollution prevention** and care for the natural environment.
- Ensuring the **occupational health and safety** of workers; using means, procedures and products that ensure safe conditions.
- Fostering a **culture of active participation** and commitment among employees and suppliers.
- Minimizing waste generation and ensuring its environmentally responsible management.
- Maintaining a documented, implemented and updated management system-reviewing it periodically to verify its effectiveness.

Compliance with this policy requires the collaboration of all the organization's employees, who have access to the procedures and documentation contained in the **Quality Management Manual**.
